APPLICATION NO.: 10/647,982

: Examiner: Dr. Carla J. Myers

FILING DATE: August 26, 2003

: Group Art Unit: 1634

TITLE: Single Nucleotide Polymorphisms  
Diagnostic for Schizophrenia

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Reply with Amendment to Requirement of Restriction/Election

The present Reply is in response to the Official Action herein of January 5, 2006, a Requirement of Restriction/ Election. A full and proper response to the Requirement is being provided even though the Requirement of Restriction' is traversed in its entirety.

Upon review of the Restriction/Election, it appears that no requirement has been made between independent Claim 1 (method of determining nucleotides) and Claim 29 (method of using determined nucleotide information) to evaluate propensity for schizophrenia. Applicant therefore inquires as to whether the Patent Office intended this result, or whether division between the two independent claims was somehow overlooked. In any case, claim 1 (and all claims dependent therefrom, Nos. 2-28) is cancelled herewith, whereas Claim 29 (and all claims dependent therefrom) remains pending.
